Jeremy.ShapiroBarr@HealthSciencesLawGroup.com

I advise clients in the health care and life sciences industries through complex legal challenges in the areas of global data privacy, security, and clinical research. I provide transactional and regulatory advice to my clients, helping them adapt to changes in the law and working collaboratively with them to develop practical solutions to comply with legal requirements. I assist clients in developing data protection policies, implementing training programs, and drafting and negotiating contracts.

My experience includes:

- Negotiation of a wide array of privacy related contracts, including business associate agreements, data use agreements, and data processing agreements
- Assisting clients in determining the applicability of global data protection laws to their organizational activities, and advising them on requirements under those laws
- Assisting clients in responding to HIPAA and state law privacy breaches
- Negotiation of clinical trial agreements, site management agreements, and contract research organization agreements on behalf of global clinical trial sponsors and research sites
